ART UNIT 1621

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-12, drawn to catalytic processes, classified in class 564, subclass 417+.
- II. Claims 13-19, drawn to apparatus, classified in class 422, subclass 129+.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process could be carried out using a batch process.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

During a telephone conversation with Ms. Bongiorno on 22 June 2004 a provisional election was made with traverse to prosecute the invention of group I, claims 1-12 (the telephonically related election further subdivided group I of which one group was claims 1-9 drawn to processes for hydrogenating unsaturated organics which Ms. Bongiorno elected, but the examiner has rejoined the subdivided groups into group I) Affirmation of this election must be made by applicant in replying to this Office action. Claims 13-19 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Leach on 28 September 2004.

The application has been amended as follows:

1. Claims 13-19 were canceled.

The following is an examiner's statement of reasons for allowance: The instant application is held to be in condition for allowance inasmuch as the prior art does not teach or suggest the catalytic reaction of reactant gases and liquids using a static mixture to produce a frothy mixture prior to introduction into a monolith reactor, enabling bubble size and flow rate to be controlled. Welp et al., US 6,521,791 and Machado et al., US 6,005,143, are cited as state of the art only.

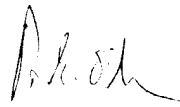

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Peter G O'Sullivan whose telephone number is (571)272-0642. The examiner can normally be reached on M-F 8-5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Johann Richter can be reached on (703) 308-4532. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
